

# STICK to the future...

“ In 1987, we designed the world's first computerized lighting controller. In 2000, the sector was revolutionised by our S.I.U.D.I. "Sunlite intelligent USB-DMX interface."  
Today, the "Sunlite Touch-sensitive Intelligent Control Keypad" which is commonly called STICK has the best assets to "Stick to forthcoming needs" and to become a new worldwide standard. ”

Bruno Nicolaudie  
Founder and President

STICK-GA2

STICK-GU2

STICK-DE3+

# Wall-mounted touch sensitive DMX controllers

The STICK range has been designed to offer the perfect lighting control solution for any environment. DMX data messages are sent directly from the STICK to a DMX compatible power supply (sometimes called a 'DMX Driver'). The power supply listens to the DMX messages and supplies the power to the lighting fixture. For example, an LED strip may use a 24 volt DMX power supply. The DMX messages are then passed on to the next lighting fixture or DMX driver.

The sensitive keys enable you to easily and comfortably modify the lighting effects...  
Controlling both speed and color has now become mere child's play.

ARCHITECTURAL LIGHTING

# EASY SETUP ROBUST TECHNOLOGY

Thanks to their 'All-In-One' technology, each STICK package includes a high-tech keypad, stand alone memory storage and a powerful DMX512 lighting software package. Mainly due to an absence of mechanical buttons, the strongly built STICK is time proof.

## DESIGN, SOBRIÉTÉ INSTALLATION SANS DIFFICULTÉ

L'absence de bouton mécanique donne au boîtier STICK une sobriété et une robustesse à l'épreuve du temps. Les designers l'ont voulu ainsi. Le boîtier STICK est adaptable aux multiples formats de boîtes électriques encastrables.

français

## DISEÑO SENCILLO FUERZA EXTREMA Y FÁCIL INSTALACIÓN

Al no tener botones mecánicos, la interfase fuerte STICK es a prueba-de-tiempo. Así es como los diseñadores lo planearon. Nuestra interfase STICK puede instalarse en una variedad de cajas eléctricas estándar.

español

## ELEGANTES DESIGN EXTREME HALTBARKEIT UND ZUVERLÄSSIGKEIT

Aufgrund fehlender Druckknöpfe hält die Box den neuesten Anforderungen stand. Genau so haben es die Designer gewollt. Die STICK Box kann an verschieden große elektrische Einbaurahmen angepasst werden.

# STICK-GU2 DIMMER SWITCH OF THE 21<sup>st</sup> CENTURY

The STICK-GU2 is a sleek glass fronted DMX wall panel. Available in black and white, this small and easy to use interface packs in 3 touch sensitive buttons, Stand alone memory and USB into an intelligent wall mounted controller just 11mm thick!

- As simple as a dimmer switch
- 3 touch sensitive buttons
- Glass wall-mounted DMX controller
- Micro-USB for programming
- Customized design for OEM
- For PC, Mac & Tablet with USB
- 32bit ARM technology
- 86x86x11mm size
- Software included
- Stand alone operation
- Ready to use (pre-loaded)
- 128 DMX channels
- Up to 24 scenes

THE MOST SIMPLE  
GLASS TOUCH DMX CONTROLLER

THE MOST POWERFUL  
LIGHTING SOFTWARE BUNDLE

THE INDUSTRY STANDARD  
FOR RGB, LED, DMX LIGHTING

**ON/OFF**  
Tap here to switch on and off

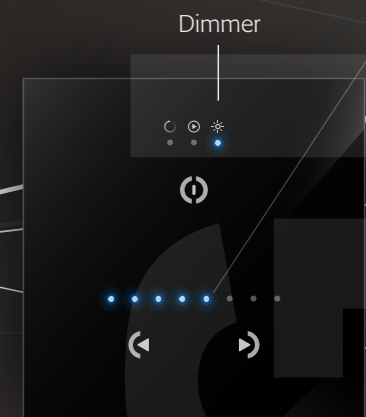

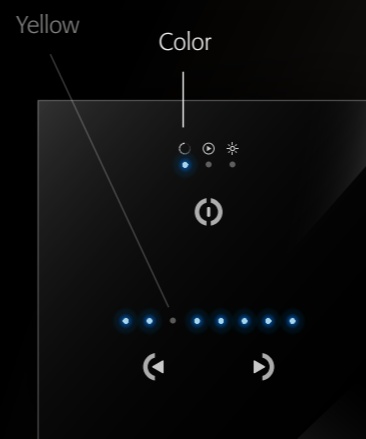

**CHANGE MODE**  
Tap here To change between color, scene and dimmer mode

**RESET**  
Tap both arrows together to remove any dimmer and color changes

**COLOR/SCENE/DIMMER**  
Tap the arrows to change color, scene and dimmer values

Tablet with USB PORT

STICK-GA2

# MIGHTY POWERFUL BEAUTIFUL & CHARMING

The STICK-GA2 offers the best solution for projects requiring a large amount of scenes along with an uncluttered and intuitive interface. The computer programmable GU2 is capable of playing up to 99 scenes, each of which can be modified by touching the mode button to change the dimmer and color.

- Large memory capacity
- 4 touch sensitive buttons
- Glass wall-mounted DMX controller
- Micro-USB for programming
- Customized design for OEM
- For PC, Mac & Tablet with USB
- 32bit ARM technology
- 86x110x11mm size
- Software included
- Stand alone operation
- Ready to use (pre-loaded)
- 512 DMX channels
- Up to 99 scenes

Compatible with :

Tablet with USB PORT

ARCOLIS  
mobile lighting control

Tablet with USB PORT

ARCOLIS  
mobile lighting control

The LED display of the GA2 makes it easy to tell which scene number is playing. The wall panel is slightly taller than the STICK-GU2 allowing it to be mounted onto any single gang wall socket around the world.

**ON/OFF**  
Tap here to switch on and off

**CHANGE MODE**  
Tap here  
To change between color, scene and dimmer mode

**RESET**  
Tap both arrows together to remove any dimmer and color changes

**COLOR/SCENE/DIMMER**  
Tap the arrows to change color, scene and dimmer values

# STICK-DE3+ THE STAR OF THE STICK FAMILY

The feature rich STICK-DE3+ has been designed to provide a control solution for the most demanding of projects which anybody can use. The controller integrates a graphical color display allowing scene photos to be displayed. Easily view the selected zone, scene name and design without the need to navigate through complex menus.

New glass design

Graphical color display

Color/dimmer/speed palette

iPhone/iPad/Android

## THE LIGHTING CONTROLLER THAT EVERYBODY UNDERSTANDS

The STICK-DE3+ is based on 4 modes. Scroll around the touch sensitive wheel to change the dimmer, color, speed or scene or tap around the wheel for direct access to a value. The arrows can be used to step through values.

Use the arrows to switch between scenes (default configuration)

### ZONE

Choose your zone and run up to 10 scenes simultaneously.

### DIMMER

Make your lights brighter/darker and adjust the saturation.

### COLOR RGB

Easily scroll through over 16 million colors, or set RGB values with the arrows.

### SCENE

Select from up to 50 static or dynamic scenes, use the arrows to change current scene.

### SPEED

Speed up and slow down a dynamic scene such as a color changing effect.

Tapping the center button will undo a dimmer, speed or color change.

Compatible with :

ARCOLIS mobile lighting control

# KE1 and DE3+ THE DIFFERENCES

# STICK-KE1 HOW TO USE ?

A truly simple controller: an on/off button at the top; 8 buttons to choose from up to 200 lighting effects (25x8); 2 buttons to cycle between pages; and a horizontal fader to instantly adjust dimmer, speed and color.

## STICK-DE3+

- Direct access to **8 scenes**
- Infrared remote control
- Customizable background design
- **5 zones** and **200 scenes**

- State of the art design with glass
- Color screen to display information
- **Circular palette** for live changes
- **10 zones** and **500 scenes**

### Both have

- **1024 channels** (2 DMX universes)
- Unlimited microSD card memory
- USB and Ethernet connectivity
- ESA, ESA2 and ESA Pro software
- Apps for iPhone, iPad and Android
- Clock and calendar
- RS232 and 8 dry contact ports
- UDP triggering

## STICK-KE1

A Blue LED is used to indicate whether the unit is on or off (Blackout).

Buttons 1-8 are used to select individual scenes. Scenes can be static or dynamic. Double pressing buttons 1-8 will reset the Dimmer, Speed, and Color to default.

Used to cycle between 25 different pages (A,B,C,D,E x 5). In combination with buttons 1-8, 200 different scenes can be stored.

The select button allows you to cycle through the Dimmer, Speed, and Color fader controls. The fader at the bottom of the unit is used to select the intensity of the Dimmer, Speed, and Color settings.

The Green LED indicates that the Dimmer, Speed, and Color settings on the STICK are set to default. If the fader is moved to the right or left of the default (green), one of the 8 blue LED's will indicate your current intensity level.

The colorized fader of the D2 design offers a direct access to basic colors with a simple touch.

### COMMENT UTILISER LE STICK ?

Rien n'est plus simple : bouton on/off en haut, 8 boutons pour choisir l'ambiance lumineuse, 2 boutons pour changer de page, un fader horizontal pour modifier instantanément l'intensité, la vitesse ou la couleur des effets.

### ¿COMO UTILIZAR EL STICK ?

Nada es más sencillo: botón de encendido/apagado en la parte superior, 8 botones para escoger el efecto lumínico, 2 botones para cambiar la página, y debajo el fader horizontal para ajustar inmediatamente el dimmer, la velocidad y el color.

### KURZANLEITUNG DES STICK'S

Nichts ist einfacher: eine Ein- und Ausschaltfläche, 8 Schaltflächen um Lichtstimmungen und Effekte abzurufen, 2 Schaltflächen um zwischen den Seiten zu wechseln, und einen horizontalen Fader um den Direktzugriff auf Dimmer, Geschwindigkeit und Farbe zu ermöglichen.

## SIMPLE USE WITH USB

USB

Using the "plug and play" USB connection is the most simple way to program the STICK controller: connect the device, start the programming software, create the show and finally press the "write memory" button to save the show into the stand alone memory.

## ADVANCED USE

90% of applications use USB and DMX512 connections only, but the most demanding of our customers will also be able to interface additional devices such as contact closures, UDP/TCP, RS232, Ethernet and more.

### CONNECTIVITÉ SANS LIMITE

90% des applications n'utiliseront que les connexions USB et DMX512, mais les clients les plus exigeants pourront aussi interfacer d'autres périphériques: Contacts sec, UDP/TCP, Entrée RS232, Ethernet...

français

### CONECTIVIDAD SIN LÍMITES

El 90% de las aplicaciones usarán solamente los conectores USB y DMX512; pero nuestros clientes más exigentes aprovecharán el resto de nuestros conectores como puertos I/O (contacto seco), UDP/TCP, entrada RS232 (serial), Ethernet...

español

### UNBEGRENZTE KONNEKTIVITÄT

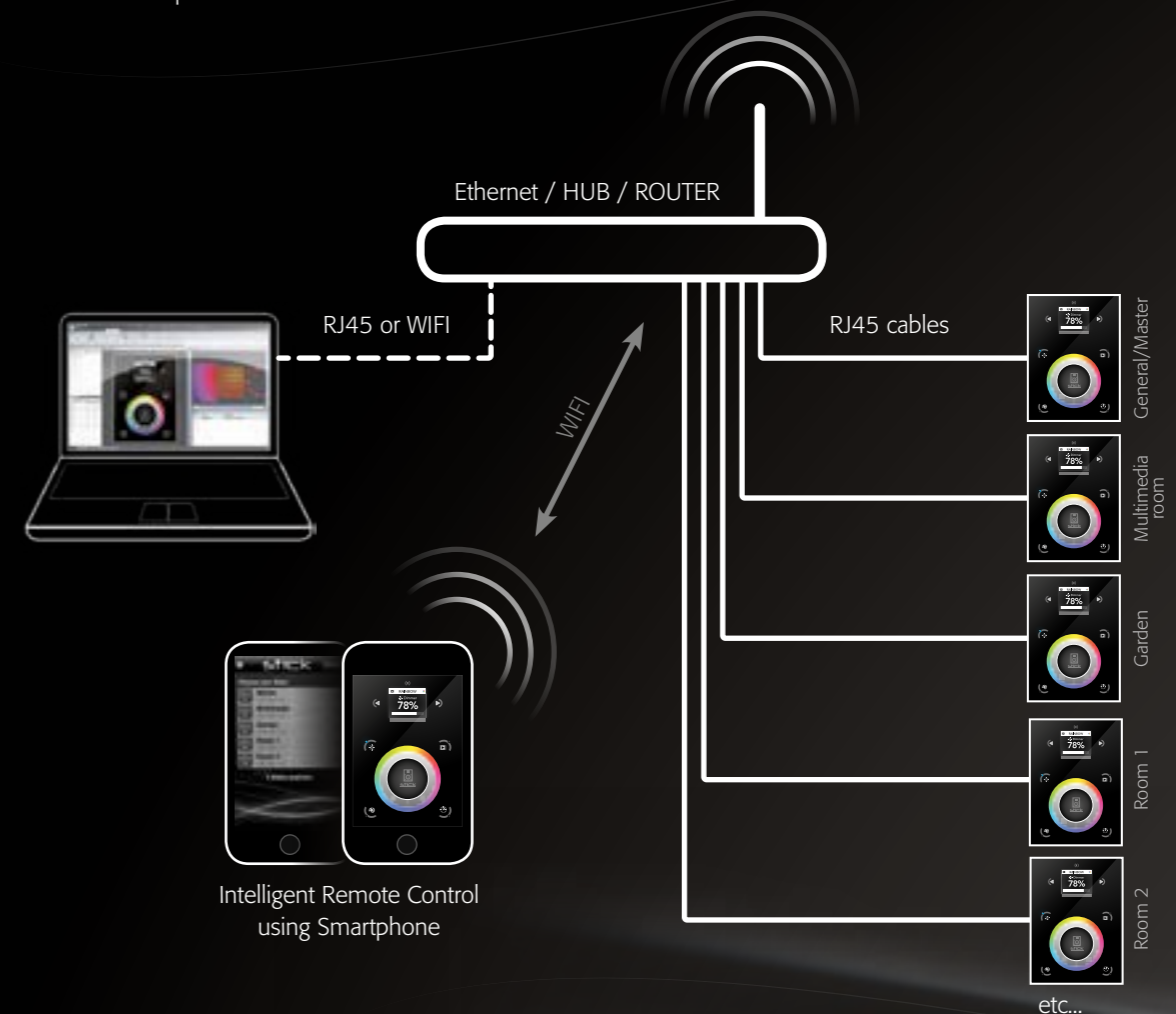

90% aller Geräte besitzen nur USB- und DMX512-Anschlüsse, aber unsere anspruchvollsten Kunden können weitere Bauteile, wie Kontaktschließer, UDP/TCP, RS232, Ethernet...

deutsch

## NETWORK SYNCHRONIZATION

The Ethernet connections of the STICK-KE1 and STICK-DE3+ offer the possibility to interconnect several STICK controllers for multi-room installations and direct control via a cable or wireless network using a computer or a smartphone. How does it work?

- A single ESA Pro show/document is used. This includes all DMX fixtures and areas.
- Multiple STICKs can be added in the Stand-Alone window. A different combination of scenes and areas can be assigned to each STICK.
- Each STICK controller's memory is written simultaneously using its name and IP address over the local network.
- Matching areas are synchronized between the STICKs. It is also possible to disable the synchronization of an area if required.

To access Ethernet network features, you need a STICK-KE1 or a STICK-DE3.

▲ Only STICKs of the same model can be synchronized

# TIMELINES WITH ESA Pro SOFTWARE

ESA Pro combines many innovations along with an ergonomic design. It has been specifically designed for the STICK SD card range and includes powerful new tools required by the latest lighting fixtures. The software has been developed specially for architectural lighting and features easy to use effects which can be dropped onto timelines, along with multi-zone and multi-STICK synchronization allowing you to program a project with multiple rooms and areas with ease.

It is possible to setup several zones for a show allowing you to split up a building for example and to play different sequences in each room.

Each zone contains a list of scenes (sequences). They can be static or dynamic, loop or not...

In this window we can group the fixtures, setup their position and then use the «Rects» to define a virtual position for a sequence. We could for instance, play several videos on the same LED screen at different positions.

Every scene is built with the timelines. Thanks to this tool, it becomes very easy to build your show.

Various effects, static or dynamic (matrix effects, curves...) are available and can be dragged to the timelines.

## NOUVEAU LOGICIEL ESA PRO

Le nouveau logiciel ESA Pro a été spécialement conçu pour l'éclairage architectural et combine la simplicité d'utilisation d'Easy Stand Alone et de nouvelles fonctionnalités nécessaires au contrôle des dernières générations de projecteurs à LED.

français

## SOFTWARE NUEVO ESA Pro

El nuevo ESA Pro es creado para la iluminación arquitectónica y combina novedades ergonómicas. Ha sido diseñado para las características del STICK el cual incluye herramientas necesarias para fijaciones LED (línea de tiempo, zona-múltiple...).

español

## NEUE SOFTWARE ESA Pro

Das neue ESA Pro wurde speziell für den Einsatz in der Architekturbeleuchtung entwickelt und verbindet innovatives und ergonomisches Design. Natürlich wurde diese vornehmlich für die STICK Funktionalitäten gestaltet und enthält neue leistungsstarke Tools, die für die jüngsten LED Geräte benötigt werden. (Timeline, Multi-Zone, Kalender, Matrixsteuerung...)

deutsch

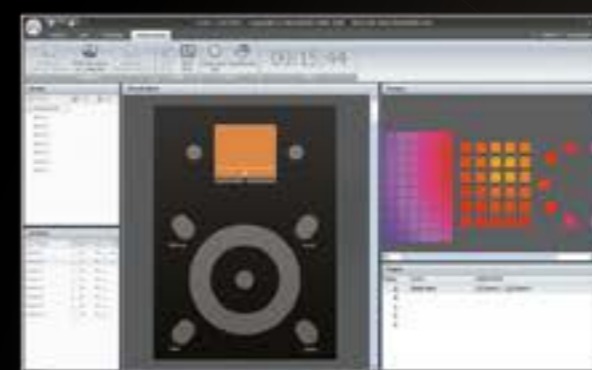

The live tab allows you to play the created sequences. You can either test your stand alone show before writing to the memory or use this tab for real-time control of your lights.

Thanks to the calendar, it becomes very easy to setup a time/date trigger for every scene. Simply drag the scene to the correct position.

The stand alone tab allows you to directly assign a scene to a button on the STICK. Simply drag and drop the scene onto the image. Once the scenes are assigned, press the «write» button to save the show into the stand alone memory.

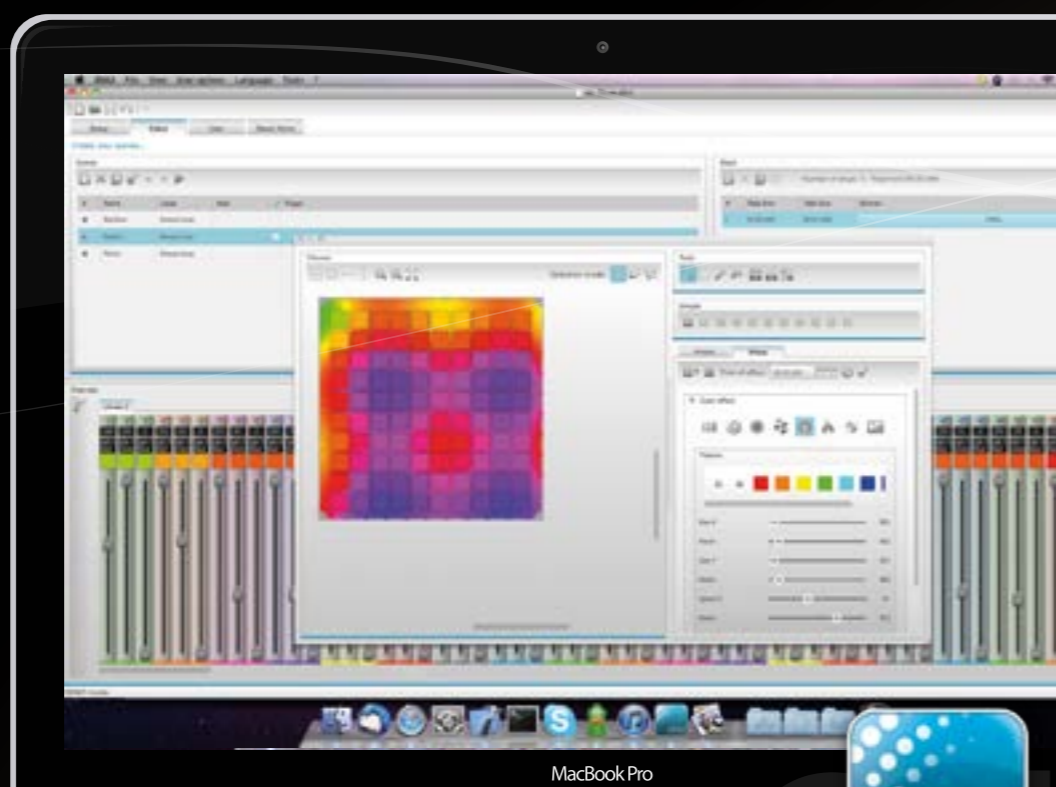

ESA Pro

# NEW SOFTWARE ESA2 PC/Mac

Easy Stand Alone 2 is the radical new stand alone package from Nicolaudie. Available for Windows and Mac OS X, lighting programming has never been more accessible.

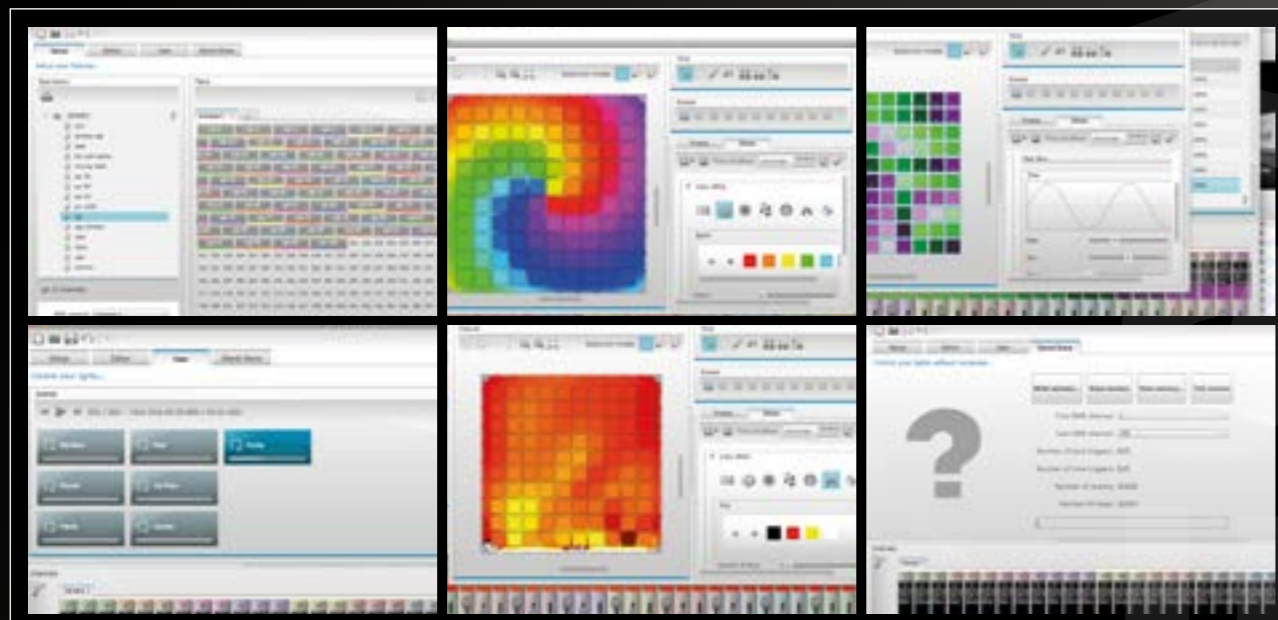

The dynamic software combines simplicity and a feature rich effects generator to make it the one of the most definitive lighting control products available. Lighting programming has never been so simple with ESA2.

Drag & drop to add your lights

Build color changing sequences

Advanced vector effects creation

Real time lighting control

Quickly create stunning effects

Play without a computer with 1 click

# ARCOLIS TOUCH LIGHTING EDITOR

ARCOLIS allows you to easily create a dynamic lighting show for any kind of DMX RGB Fixture. In just a few steps, you'll be able to take control of all your DMX equipment in live, or Stand alone mode.

ARCOLIS is innovating in terms of architectural lighting control. It is available to fit the trendiest portable devices and has become the ideal partner on your worksite or at home to dynamically control your lighting. Thanks to its exclusive concept, selectively changing the lighting surroundings in each area is now made as simple as phoning or sending a text message!

ARCOLIS is compatible with any iOS and ANDROID smartphones or tablets. By using your mouse or touch screen, the various software screens allow you to directly monitor the current environment or to re-program new static or dynamic light environments. ARCOLIS is a simple application which can be used by just about everyone in any situation.

ARCOLIS  
mobile lighting control

# STICK REMOTE & DMX LIGHTPAD 3 WIFI REMOTE CONTROL

STICK Remote allows you to control the STICK-KE1, and DMX Lightpad 3 is used to control the STICK-DE3+. Simply connect to your wireless local network, the app will automatically find all the STICKs and allow you to control them all at once.

You can set individual passwords for each STICK to prevent unauthorized access.

With a simple and intuitive graphical interface you will be able to control all your DMX fixtures easily, without any technical knowledge.

Triggering scenes and changing the speed, color and intensity has never been so simple!

# EASY REMOTE

## Take your lighting control to the next level

Create an entirely customized remote controller for your tablet or smartphone. Easy Remote is a powerful and intuitive app allowing you to easily add buttons, faders, color wheels and more.

It can control our Ethernet enabled stand alone controllers: STICK-KE1 and STICK-DE3+.

Connect to a WiFi network and the app will find all compatible devices.
